
About Us

Acrow Limited (ASX: ACF) is a national leader in smart, integrated construction and industrial access systems. Our capabilities span formwork, falsework, shoring, screen solutions, and Jumpform systems, now further strengthened by strategic acquisitions that enhance our reach across industrial services and workforce development.

With operations across 17 locations and more than 65,000 tonnes of equipment, each acquired business brings specialist expertise that contributes to Acrow's mission of Raising the Standard in engineered construction and industrial services

Our Vision, Values & Purpose

Our vision is to set the national standard in engineered industrial and construction services.

We are your Smart, Can-do, Partners. Our core values drive us to embrace change, prioritise safety, and deliver exceptional results while fostering a united and customer-centric team.

We partner with industrial and construction professionals to remove their barriers to success.

Acrow Innovations

Acrow have a dedicated internal Product Development team, made up of Industrial Engineers and Designers, who are responsible for the full product development life cycle from brief to implementation, designing products for the Australian market.

Sectors We Serve

- Civil
- Commercial
- Health & Utilities
- Residential
- Oil & Gas
- Power Generation
- Refineries
- Marine
- Asset Maintenance

Engineering

This is the heartbeat of our business. We have the largest dedicated temporary works design team in Australia, with design offices in Brisbane, Gold Coast, Sydney, Melbourne, Adelaide and Perth.

Formwork

Acrow has the largest and most versatile formwork equipment range in Australia. This includes products and systems for falsework and shoring, as well as specialised bespoke systems.

Scaffolding

Acrow are a leading supplier of access scaffolding systems including Uni-ring, Cuplok, Quickstage, SuperCuplok and Tube & Clip, including the patented Uni-mesh (fire retardant) scaffolding containment system.

Screens

Acrow screens and edge protection solutions have become renowned in the industry since 1989. Large developers and constructors recognise the site efficiencies from using screen systems.

Jumpform (Jacking Systems)

Acrow Jumpform stands as a critical component in the construction of multi-level projects. Acrow's entry into this market further reinforces our position as the premier provider of Engineered Formwork Sales and Hire solutions within the Australian construction industry.

Industrial Access

This business division has a strong focus on the industrial, oil, gas and mining sectors, concentrating on the supply of permanent, contract and interim personnel. Such scopes of work include commissioning, decommissioning, increases in project demands, shutdowns and maintenance crews.

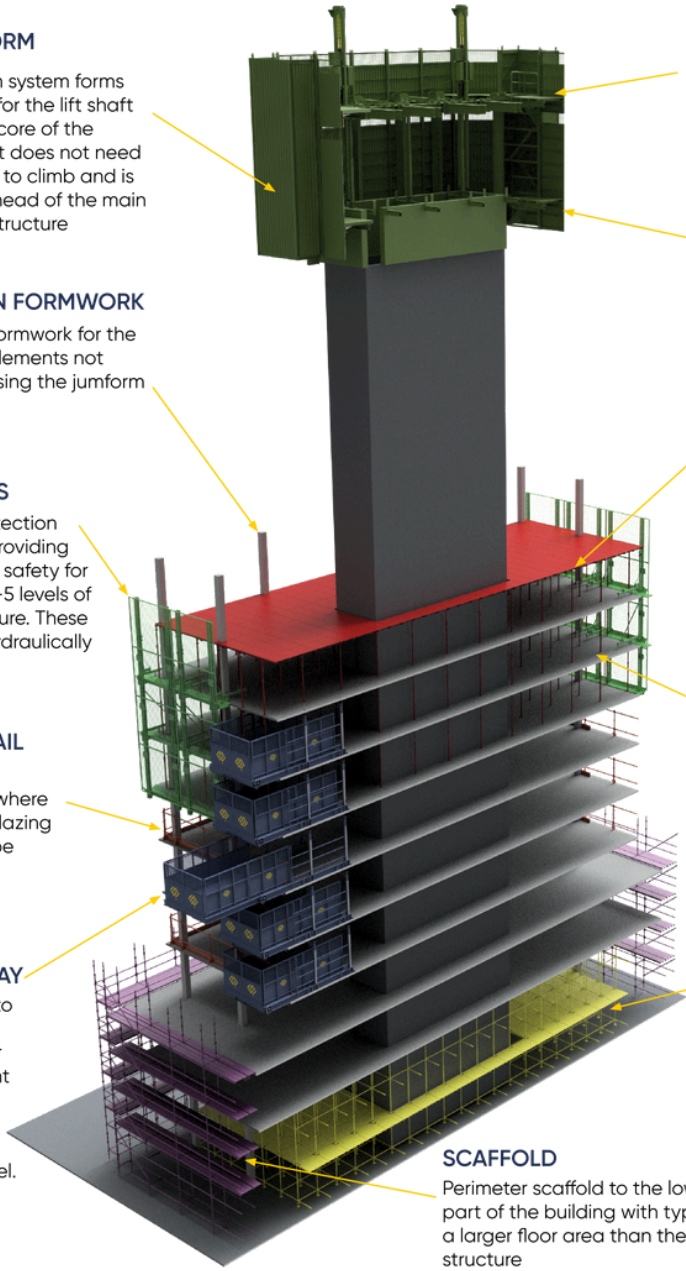
Overall Assembly



JUMPFORM
Jumpform system forms the walls for the lift shaft and stair core of the building. It does not need the crane to climb and is always ahead of the main building structure

The system climbs with electric ball screw jacks that are computer controlled

The system climbs 3m in 25mins and cannot climb out of plumb

COLUMN FORMWORK
Column formwork for the vertical elements not formed using the jumform system

ACROWDECK
Acrow Deck slab support system is used to form the horizontal concrete floors

SCREENS
Edge protection screens providing perimeter safety for the top 3-5 levels of the structure. These can be hydraulically climbed

BACKPROPPING
Props below the Acrowdeck to backprop and transfer the load over multiple slabs.

HANDRAIL
Perimeter handrail where facade glazing is yet to be installed.

ACROW LOADING BAY
Loading Bay to accept loads from cane per a level efficient and safely. Loading Bay installed on each floor level.

FALSEWORK
Supercuplok high strutting falsework to the slabs with a floor to floor height typically over 6m which is usually the lobby area

SCAFFOLD
Perimeter scaffold to the lower part of the building with typically a larger floor area than the main structure
